

Link 16 Computer Based Training Integrates with Web 2.0 Technology

NCS is pleased to announce that it has completed a major upgrade to its Link 16 Computer Based Training (CBT) Course. The upgrade includes an enhanced user interface, more than 350 audio instructor files, 250+ colourful graphics, 22 instructional modules, and the integration with our new Learning Management System.

Like every NCS course, the Link 16 / JTIDS / MIDS CBT is objectives based, and was developed using our unique Instructional System Design (ISD) process. The course covers 135 specific Learning Objectives, which are verified through our multi-level testing system. The course offers flexible licensing options that support:

- Per-seat license (Single students)
- Group license (5, 10, 100, etc)
- Organizational license (unlimited seats for students from company / organization)
- Term license (1, 3, 5 years, etc)

The Link 16 / JTIDS / MIDS CBT is an extremely comprehensive Foundation Level Course that is suitable for the following personnel:

- Individuals with little or no experience
- Individuals requiring refresher training
- Individuals requiring updated Link 16 / JTIDS / MIDS information
- Individuals requiring Foundation training prior to Advanced / Expert Level Courses

Our user-friendly AICC / SCORM 1.2 and 2004 compliant Learning Management System (LMS) delivers our media-rich training content to students at their own pace, at their convenience, and at an affordable price. The LMS is extremely flexible, enabling customers with a recurring training requirement to completely manage their organizations training, to include:

- Course enrolment
- Course start / stop dates
- Assign required modules
- Track student progress
- Track student test results
- Issue certificate of completion

Multiple Report Options

A number of standard reports are provided to analyse the progress and effectiveness of the training, to include:

- Individual / Group Activity Reports
- Course Starts / Completes Report
- Response Summary / Detail Reports
- Event Registration Report
- Active Login Report
- Login Summary Report

Multiple Format Options

In addition to viewing reports online, reports can be exported, giving you the option to slice and dice your data any way you want. Reports can be exported into the following formats:

- HTML
- PDF
- CSV (comma delimited)
- XML
- Microsoft Excel

Support / Track Student Usage

Course administrators can import student profiles or create them manually. They can also customize the system to collect the information that best suits their needs. Track usage, reset passwords, and edit training status from a single intuitive interface.

No Software / Plug-ins Required

Use any modern web browser (Internet Explorer 6+, Mozilla Firefox, Safari, Google Chrome, or Opera 8+). No plug-ins are required or Java applets to fight with.

For more information about the Link 16 / JTIDS / MIDS CBT, please contact NCS (director@network-centric.com).
